

CO CURRICULAR ACTIVITY

Eleven of our second year students had the proud opportunity to present paper and to participate in photography at **POLYVERSE 2K26** held at **Nachimuthu Polytechnic College**, Pollachi on feb 4th 2026. A reputed institution known for encouraging academic excellence and innovation. The paper presentation event served as a platform for young learners to showcase their technical knowledge, creativity, and communication skills. Our students enthusiastically took part in the **Photography Competition**. The event provided a creative platform for young talents to showcase their skills in visual storytelling, composition, and technical photography.

The paper presentation at **Nachimuthu Polytechnic College** was a memorable and enriching experience for our students. It not only strengthened their academic knowledge but also improved their research, communication, and presentation skills. Such opportunities play a vital role in shaping students into confident and competent professionals.

The photography competition at **Nachimuthu Polytechnic College** was a memorable and enriching experience for our students. It not only enhanced their artistic abilities but also motivated them to look at the world with a creative lens. Such opportunities nurture talent and encourage students to balance academics with cultural and creative pursuits.

Our students proudly participated in the **Project Presentation – Innovation Day** organized at **Nandha Polytechnic College** on **February 5th and 6th**. The event served as a platform for young innovators to showcase their technical skills, creativity, and problem-solving abilities through practical projects. The students **S.R.Samyuktha, M.Santhosh, and A.Keerthivasan** actively participated in this innovation event and presented a project titled **“Car Parking System Using PLC.”** The project focused on applying Programmable Logic Controller (PLC) technology to develop an efficient and automated car parking management system, showcasing practical industrial relevance, automation concepts, and innovative problem-solving skills. The students demonstrated strong technical knowledge, teamwork, and creativity throughout the event. Their project was well appreciated by the judges for its clear design, logical implementation, and applicability in real-time industrial and commercial environments. The management and faculty of Sakthi Polytechnic College expressed their pride and happiness over this achievement. Dr.S.Senthilarasu, Principal, Dr.K.R.Muthuswamy, Director, Mr.P.V.Raghunath, Head of the Department (I&C), along with the department staff members, appreciated the students’ efforts and congratulated them on their success.

Our students explained the project to the school students

The **Innovation Day Project Presentation** at **Nandha Polytechnic College** was a highly enriching experience for our students. It not only strengthened their academic knowledge but also nurtured their innovative spirit and communication skills. Such opportunities play a vital role in shaping students into confident and competent professionals.

Our second year students actively participated in a **Paper Presentation Program** organized **Sri Venkateswara Polytechnic College**. This event is to encourage technical knowledge, research skills, and confidence in presenting innovative ideas. The event provided an excellent platform for students to showcase their creativity, analytical thinking, and communication skills. The program not only helped students enhance their technical knowledge but also improved their confidence in public speaking and teamwork.
